Gaming and Amusement

Innovative Solutions

Starpoint Reel Mechanisms

There is a Starpoint reel mechanism suitable for every type of AWP and slot machine application, with a choice of modular reel drum models or Starpoint Flexi-Strips.

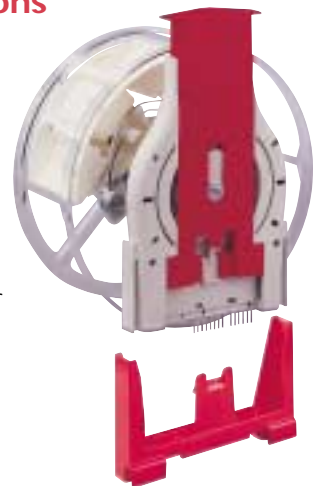

Reel Mechanisms

Modular reel mechanisms - available in 6 styles with hundreds of variations

20RM - Market leading reel mechanism with unique 'Handle and Latch' fitting system.

19RM - Compact unit (150mm diameter, 66mm wide reel drum) with 'Handle and Latch', ideal for bar top machines or confined spaces in standard machines.

Starpoint Flexi-Strips

FS1RM (Flexi-Strip) - There are already over 200,000 Starpoint Flexi-Strips in operation worldwide. Ease of fitting and the exceptional combination of quality and value for money have made them an industry standard. Available in 4 styles with flexible bands.

RMS

Reel Movement Sensing security system utilises encoder strip technology to protect against tampering. Designed for use on the 12RM.

Starpoint Plus-Points

- Factory configured for installation straight from the box.
- Modular design and construction offers complete flexibility in machine design.
- Handle & Latch fitting system for even faster assembly with full mechanical and electrical connection in just one movement.
- Optional lamps moveable through 360 degrees to give complete flexibility and allow mounting in any position.

Starpoint Game Devices

Flexi Disc

An innovative 34cm diameter feature disc bent through 90° which can be viewed in an arc only 16cm high. Ideal for small "bartop-style" cabinets or for use in close proximity to other reels or game devices.

1DU

The definitive true-to-life tumbling dice, perfect as a secondary feature.

Game Devices

1DM

A modular flat disc mechanism allowing rear illumination of any variation of symbols.

VDM (Variable Display Mechanism)

Large-scale moveable band device which changes the traditionally static top glass of an amusement or gaming machine into a dynamic, moveable feature glass. Provides a 144 lamp matrix and a viewable area of 36cm x 36cm.

FM2

Feature mechanism with an easy-to-fit, removeable band for feature graphics, over a 36 lamp matrix. Offers complete control of up to 144 illuminated symbols, viewable area is 18cm by 18cm.

Starpoint Illuminated Push Buttons

The Starpoint Push Button range provides an unrivalled choice of styles and connection options and encompasses everything from graphic inserts to harness solutions, enabling game designers to create the complete push button panel.

More than 30 styles at www.starpoint.uk.com

Available in any colour (solid or translucent) and in a wide range of shapes and sizes to suit all applications. The Classic and Series 2 push button ranges include more than 30 different designs.

Choose from a range of bezel styles including the new soft curved styling of the Series 2.

Illuminated Push Buttons

Choice of Classic body or compact Series 2 design. The Series 2 features a body length 50% shorter than standard push buttons to save space and allow even greater flexibility when laying-out the button panel.

Starpoint Plus-Points

- Extensive choice of designs to suit any button panel
- Fast delivery to exact specification to enable assembly straight from the box
- Twist Lock Switch Lampholder for easy servicing on Series 2
- Outstanding reliability in the field
- Fast-response, positive action for maximum playability

Classic

Series 2

Starpoint Push Button options

Luminescent

The luminescent push button range has a separate translucent ring which sits behind the traditional bezel. This allows light to escape around the base of the push button to create a bright, eye-catching glow on the button panel.

LED

LEDs offer almost infinite reliability. Solid state technology eliminates the need to change bulbs, removing the costs of service and maintenance, as well as extending the push button's useful life.

Push Button Options

Feature push buttons

Feature push buttons provide either dual or triple illumination, a double push button with 2 switches in one body and integrated 7-segment displays.

Connection options

The Starpoint Push Button range offers two build options: traditional 'spade' terminals or the unique Starpoint Advanced Technology (AT) Connector.

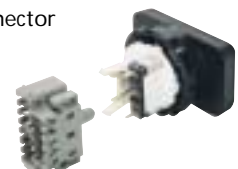

The AT option reduces assembly and harness costs significantly. A single Insulation Displacement Connector (IDC) replaces 4 spade terminals, reducing the number of connections by 75% and ensuring "right first time" installation. Optional diodes incorporated in the connector allow lamp and microswitch matrixing to reduce harness costs and electronic interfacing.

Joystick push button

Joystick push buttons offer all the attributes of a joystick in a low profile format, with nine position operation and tactile feedback for the player.

AT Connector

Spade connector

Starpoint Electronic Counter (SEC)

with 7 digit Liquid Crystal Display. Utilises highly-reliable solid state technology for replacement of up to 31 mechanical meters.

Starpoint Lampholders

with IDC termination for 5mm or 10mm wedge-based bulbs, allowing fast and efficient assembly and maintenance.

Full range of harness accessories

includes Starpoint Air Gun with interchangeable heads for one shot wire insertion, in production quantities, of AT Connectors, diode/link adaptors and Starpoint lampholders. Hand insertion tools and harness fixtures complete the range.

Starpoint Electrics Ltd

Starpoint is a world-leader in the design, development, manufacture and supply of products for the amusement and gaming markets, with a comprehensive range of illuminated push buttons, reel mechanisms, game devices and accessories.

The company was founded in 1968 to serve the established vending industry and the growing amusement market.

In the last thirty years Starpoint has become truly international. Through direct sales, and via a network of approved distributors, the Starpoint range is supplied to customers in over 30 countries and 5 continents.
